"HIS SECRETARY"

a Metro-Goldwyn-Mayer picture

ALSO A GOOD TWO REEL COMEDY

CLARESHOLM LOCAL NEWS

Mrs. Jas. Laidlaw is on the sick list at present.

Robt. Vance has bought a new Rumely threshing outfit.

Claresholm schools will open on Wednesday, September 1st.

Austin Allen was the winner of the suit of clothes in the Boy Scouts' drawing.

Miss E. McDonald of Calgary is here visiting at the home of her brother R. S. McDonald.

Miss Ethel Amundsen is very ill in the hospital at Calgary. An operation will be necessary.

A band of gypsies traveling down in autos, passed through town Thursday, heading south.

Gospel meetings in Mr. Smedstad's hall every evening 8 o'clock Mondays excepted. All are invited.

Mrs. Raine and Miss Ivan Bird, of Detroit, Mich., are here visiting at the home of Thos. Moore.

Norma Shearer with Lew Cody in "His Secretary," at the Rex theater on Friday and Saturday nights this week. It's a Metro-Goldwyn-Mayer picture.

Mr. and Mrs. Howard Maxwell and children spent a few days at Banff this week, where they went to meet Mrs. Maxwell's uncle and aunt. Mr. and Mrs. Dresser of Chicago.

Harvesters have continued to arrive in considerable numbers during the week, but the wet weather has prevented employment, hence the town is full up with harvesters.

Wet weather for several days the past week has delayed grain cutting. The moisture will be of benefit in filling out late grain—that is, it will be of benefit if frosts hold off long enough.

The Liberals of this riding, in their convention at Macleod last Friday, decided to not put a candidate in the field but to extend their support to G. G. Coote, the U. F. A. candidate. The Labor party will also support Mr. Coote.

CORRESPONDENCE

Glacier Park, Montana, Aug. 16, 1926.

Editor of Claresholm Review.
Dear Sir:—This is a Glacier Park, Montana, Forest Ranger Camp. The forests are burning 50 miles south. There are 1,000 civilians and soldiers fighting it in relays, day and night. The forest fire was started by the explosion of a government truck.

I have been patrolling creeks, rivers and lakes and putting up fishing posters. I came to Waterton Lake Park with orders from Fishery Headquarters at Vancouver, to close Wall Lake (which is about 15 miles from Waterton Lakes) to all fishermen who are without a license. I have appointed a man deputy fishery officer to see that the fishery laws are enforced. If any people from the Claresholm district wish to fish in Wall Lake they can get the permits of me after August 23rd when I expect to be in Claresholm.

Stanley H. School,
Fishery Guardian and
Mounted Constable for
British Columbia.

Canadian Pacific Crop Report

Winnipeg, Aug. 16.—The weather and crop report of the Canadian Pacific Agricultural Department for the three prairie provinces and British Columbia for the past week is favorable.

Cutting was delayed in northern and central portions of Alberta but with favorable weather cutting will be general around the 25th. No hail or frost apart from sawfly damage no other menace to crops. Rainfall has been most beneficial to late sown grain and forage crops. Better than average yields expected and crop fully equal to last year.

All points along the Edmonton, Dunvegan & British Columbia Railway show uniformly excellent yield of wheat and other grains. Anticipating good weather cutting will be fairly general by the end of the present week.

CORRESPONDENCE

Charford, Devon, England, July 7, 1926.

Editor of Claresholm Review.

Dear Sir:—Your interesting paper came to hand as we were enjoying gooseberries and Devonshire cream, and reminded me of my promise to write.

Fortunately for us we did not meet with the calamity of our car breaking down as your paper stated, but enjoyed a very pleasant tour through the state of Montana as far as Billings and back about 1200. The first bit of our journey took us as far as Shelby, through the oil fields of Sunburst and Kevin, where they were loading cars with crude oil, shipping out to Calgary and points south, Great Falls and Lewiston. At one point we noticed 25 or 30 derricks all close together. At Shelby we found a good auto camp with electric lights, gas cooking, and shower baths, in enclosed grounds. The town is situated in a valley, and continuing our journey we had a wonderful view of mountain and valley with good smooth surface roads continuing through the state. Great Falls is a very nice city with its ant camp pleasantly situated by the river bank. Here we visited the falls and rambled round the city.

Over a rolling country we drove as far as Stanford that night and continued through Lewiston to one of the oil refining cities and a colliery district. Beyond this eighty-five miles south was Roundup where we were interested in seeing the homes of the cave dwellers some of which were still inhabited.

At Billings, the railway center, we spent the week end. A nice little park is at the disposal of the tourist with every accommodation for fifty cents per day, and from here southwest we were not far from the Yellowstone Park which we did not have time to visit.

Gasoline prices were no cheaper than Alberta prices until we reached this point, but road conditions made it possible to increase mileage very considerably.

We saw no farming conditions in any locality except to the Claresholm district. On our return we spent a night at Great Falls and Lethbridge auto camps and were well pleased with our journey.

Taking train from Staveley, we went on to Edmonton, thence to Winnipeg and Toronto, visiting places of interest including all the parliament buildings. (While at the Edmonton house we wondered how all those seats would look after the election.) At Toronto we crossed Lake Ontario and had a wonderful day at Niagara Falls and the following day again over the lake, down the River St. Lawrence, through the Thousand Islands and over the apids to Montreal where we changed from the small esel to the large ocean liner, continuing our trip down the river, passing old Quebec and over the great Atlantic pond. Every westerner should visit these wonderful places round Toronto and we look forward to see more of it on our return. The foliage and blossom was good to feast upon again.

Now we are in Merry England, of which I will write you again. Awaiting the latest Alberta news,

Yours truly,

J. W. Halliell

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that Fred Collier and Thos. Moore of Claresholm have made application to the Minister of Public Works at Edmonton, for a lease of the following road allowance, viz: the road allowance lying south of section 4-13-28-W4.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, within thirty days from the date of this notice.

Dated at Claresholm this 6th day of August, 1926.
Fred Collier & Thos. Moore, Applicants.

A Cleanser, Germicide, and Deodorant

PARKE, DAVIS & CO.'S Germicidal Soap does three things at once: cleanses, kills disease germs, and destroys the odor of perspiration.

The soap lathers freely and cleanses perfectly. The inside of mercury in the soap kills the germs. Infections are prevented. And the odor of perspiration is destroyed.

Germicidal Soap is a wonderful soap for every-day use. The wonder is 25 cents a cake.

Have a Hobby

Among the many excellent features of that splendid organization, the Boy Scouts, is the encouragement and development of hobbies. It was recognized by the founder of the Boy Scouts that boys of a certain age favorably group together for their activities, whether in play or work; that the "gang spirit" prevails. And almost without exception these boys individually have some hobby which to them is of absorbing interest and arouses their enthusiasm, although to others it may appear quite unimportant, even futile.

It is part of the Boy Scout programme to encourage boys to adopt some hobby that is really worthwhile, one that appeals to them, and to then help them to develop a hobby to a point where it will prove of real value to them and to their fellow men. Thus the Boy Scouts offer badges for efficiency on the part of its members for an almost inconceivable number of things.

Life is full of instances of men and women who have developed their hobbies to a point where they became the real passion and business of their lives, resulting in important discoveries and inventions and bringing untold blessings to the world, as well as fame and often fortune to the hobbyist.

George Eastman, the Kodak inventor and manufacturer, was a bank clerk and, preparing for a holiday trip, he decided to take pictures of places visited and send home to his widowed mother. In those days, half a century ago, amateur photographers were few in number because the paraphernalia required was bulky and crude and the work of picture taking, developing and printing difficult. Eastman thought it could be simplified and in his spare time in his mother's kitchen made photography his hobby. The result is well known.

Latter Burbank's hobby was horticulture, and he shared the world with his achievements in the development of new plants and flowers and in demonstrating how they could be improved in size and beauty. Jack Miner, Thompson-Stetson, and others have made the life and habits of birds their hobby, with the result that mankind has learned much more of the feathered folk, and how, without their help, destructive grubs, worms and insects would soon play havoc with gardens, orchards and our food supplies. Another man, Johnstone, was a bird lover, and he has been very successful in growing all kinds of tropical and sub-tropical trees and plants which he has proven that many things which the United States now imports from foreign lands to the extent of hundreds of millions of dollars can be raised at home.

Many a boy has a mechanical turn of mind which soon finds expression in some form of hobby and which, if rightly directed, encouraged and developed, may point to the occupation in which he may find the greatest enjoyment and success in life.

But apart from hobbies of this character, it is well that the business and professional man and woman should have a hobby. It should be something distinctly different from that of their everyday occupation. Thus the professional and office man will find health, recreation and downright pleasure in devoting his spare time to the development of some hobby that takes him out doors and calls for the use of his hands rather than the concentration of his mental faculties.

There is, fortunately, a growing realization of the value of hobbies, although they are not always classified as such. Service clubs in all cities are more and more turning their activities in the direction of helpful humanitarian service. Thus we find these Club members making a real hobby out of providing outings for orphaned, undernourished and crippled children, and finding as much pleasure in doing so as they provide for these little unfortunate.

Hobbies there are such as the collecting of stamps, coins, antiques, china, pictures and other articles too numerous to mention. These all have their value in feeding the mind from too close and constant application to business affairs and worries, even though they may not result in adding anything very worthwhile to the lives of others and the advancement of the world.

The main thing to have in mind is to have a hobby which will help you to lead a life of direction and carefully refrain from idling away what may seem either silly and purposeless to them. Sympathetic study of a child's hobbies may give a valuable indication of the direction which such child's training should be given.

The Dangerous Speed

Forty-five Miles An Hour Most Dangerous Motor Speed In Doctor's Opinion

They drive an inch in England is the most dangerous speed for motorists, it was stated at all meetings of the United States flag at all meetings of the Kiwanis Club at South Orange, N.J.

The maple leaf banner was presented to the club recently by George H. Becker, president of the town council, in appreciation of the courtesy and hospitality shown him on his recent trip through Canada as a representative of the local club.

In Canada, Mr. Becker said, United States and Canadian flags were displayed side by side at Kiwanis meetings.

But if something happened when travelling at 45 or 50 miles an hour, Dr. Gardner said, the victim generally was tossed in such a manner that he often landed on his head, suffering from serious injuries or death.

"Why do churches take up collection?"

"Need funds, I guess."

"Not at all! They don't want to make people good for nothing."

Stomach Upset?

Mount Fyatt Conquered

One of the Highest Peaks in Athabasca River Section Has Been Scaled

Mount Fyatt, one of the highest and most formidable peaks in the Athabasca River section of the Canadian Rockies, has been scaled by Howard Palmer, of New London, Conn., and Dr. J. W. Hickson, of Montreal.

The mountain with precipitous shale slopes on one side, and higher glacier fields on the other, had hitherto resisted all attempts to conquer it. In recent years it had been placed in the category of peaks which it was thought would never be climbed.

In several ways the climbing of Fyatt is unique. It was accomplished under severe handicaps, the hardest of which was caused by the fall of smoke from forest fires to the south.

This smoke practically blanketed the valley and slopes and reduced visibility. In spite of this, however, the climb was accomplished in record time.

Joint Soreness Subdued
Swellings Quickly Reduced

Wonderful Results From Rubbing the Nerve Line

My telephone should convey one message to you: 'Nerve Line' is a splendid preparation to use on swollen joints. Rheumatism left me on my hands and feet. After a few days of Nerve Line, my joints were free of pain. I am now able to do my work as usual. I am now able to do my work as usual. I am now able to do my work as usual.

For Rheumatic pain, Lumbago, Sciatica, you will get lasting satisfaction from the Nerve Line. It is sold everywhere.

Enjoy Life In Siberia

German Army Officers Take Prisoners By Russian Prisoners To Be Repatriated

More than two hundred former German army officers and men, taken prisoners by the Russians during the war and exiled to Siberia, like the frozen wastes so well that they refuse to come back home.

This is revealed in a statement of the German Government which denied reports that the Soviet Republic was detaining the Germans in Siberia against their will.

Since 1922, the statement continues, the government has offered each exiled transportation back home. It is three years today that have taken advantage of the offer, while two hundred and sixteen have become Russian citizens. All have settled on farms and earning a good living.

Find Missing Link

Explorer Secures Photographs of Strange Tribe in Philippine Islands

Photographs of what his owner, W. H. Wood, states were specimens of a tribe of about 200 "missing links," which he had discovered in a remote district of the Philippine Islands.

Wood, who is a woman, was apparently arrived from Chile. Mr. Wood is said to be a Swiss scientist.

Wood said he had secured the photographs with great difficulty, after remaining for seven days among the tribe of hill men. One of the photographs was of a woman who apparently had a tall-like continuation of the spine.

The tribesmen, according to Wood, refused to pose for pictures, and those which he managed to take were snapshots secured while the subjects were unaware of his actions.

A pleasant medicine for children is Mother's Own Emulsion, and it is excellent for driving worms from the system.

Radio In Canada

Six Plants in Canada Engaged in the Manufacture of Radio Equipment

Production in Canada of radio apparatus including sets, parts and accessories reached a total value of \$5,548,859 in 1925, according to a recent statement issued by the Canadian Government Bureau of Statistics at Ottawa. Six plants in Canada were engaged solely in the manufacture of radio sets or parts, nine others concerned made sets and parts in conjunction with the manufacture of other electrical apparatus, and 12 of the manufacturers of batteries in Canada reported an output for radio purposes.

Statistics for 1925 show a substantial growth in the radio industry during that year and also reveal a tendency toward the production of complete sets rather than the manufacture of separate parts. In 1925 the number of complete sets manufactured by these companies was 45,995 and the selling value, f.o.b. works, was given as \$2,196,041. Production of vacuum tubes amounted in value to \$1,044,184 and was double that of the previous year.

Radio licenses were issued by the department of marine and fisheries during the twelve months ending March, 1926, to 134,148 persons. Ontario led all provinces with a total of 60,110; Quebec was next with 21,111. Registrations in the other areas were as follows: Saskatchewan, 15,941; Manitoba, 14,567; British Columbia, 4,942; Alberta, 7,132; Nova Scotia, 2,585; New Brunswick, 2,612; Prince Edward Island, 292; Yukon, 21; and the Northwest Territories, 17.

Licensed broadcasting stations, not including amateurs, numbered 55, distributed as follows: Ontario, 24; British Columbia, 10; Saskatchewan, 7; Alberta, 6; Quebec, 4; Manitoba, 2; New Brunswick, 2; and Prince Edward Island, 1 each.

SOME SYMPTOMS

OF THIN BLOOD

Everybody Should Be Able to Recognize Them Because Early Treatment is Important

Anemia, or lack of blood, is a subtle but real danger to your health. It is often called "thin blood" because it is so easily recognized. It is often called "thin blood" because it is so easily recognized. It is often called "thin blood" because it is so easily recognized.

Some symptoms of anemia are less than others. They are: weakness, sleeplessness, shortness of breath after slight exertion, and often extreme nervousness. If you have any of all these symptoms, begin treatment at once with Dr. Williams' Pink Pills, the tonic which will make the blood rich and plentiful. Every part of the body will respond to this treatment as is shown by the case of Mr. Isaac Bell, Sr., of Port Anson, Ont., who says: "A few years ago I was a very thin man. I was all the time nervous and my nerves badly shattered. I was unable to do my work. I was unable to do my work. I was unable to do my work."

Dr. Williams' Pink Pills are sold by all druggists, or may be bought by mail at 50 cents a box by writing Dr. Williams' Medicine Co., Brockville, Ont. A free booklet, "Building Up the Blood," will be sent to any address on request.

More Wheat This Year

Predicted World's Output of Wheat Will Show Great Increase

Prospective wheat production this year in twelve countries, producing 63.5 per cent of all wheat in the world, shows a large increase over last year. Russia and China, is placed by last estimates at 1,597,000,000 bushels compared with 1,490,000,000 bushels last year.

Production in European countries is expected to be smaller than last year, but the decrease is more than offset by prospective increases in the United States, the department of agriculture announced in making preliminary estimates from abroad.

Canada Protects Railways

The custom of American manufacturers of automobiles to drive new cars across the Canadian border has aroused the Canadian department at Ottawa, the officials of which maintain that this is a discrimination against the railways that should be stopped. They say it is not only unfair to the railways, but if allowed to continue would cause congestion in the highways at times.

Life is an uphill yard if you happen to be going in that direction.

Minard's Liniment for Rheumatism

The fly family learns the shortest distance between two points

GERMS—6,000,000 germs on a single fly, says a food health officer. Protect your family with FLIT. Fly spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

FLIT spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray FLIT on your garments. FLIT kills moths and their larvae which eat holes. Extensive tests showed that FLIT spray did not stain the most delicate fabrics.

FLIT is the result of exhaustive research by expert entomologists and chemists. It is harmless to man, but it has replaced the old methods because it kills all the insects—and does it quickly. Get a FLIT can and spray today.

Will Be Presented With Medal

Scientist Selected To Be Honored By American Chemical Society

Mr. James Irvine, principal of the University of St. Andrews, Scotland, since 1921, and a member of the advisory council, department of science, department of industry and research, has arrived in Canada. The object of his visit to this continent is to receive the Willard-Gibbs gold medal from the American Chemical Society.

The last scientific note to which this medal was awarded was Madame Curie. Although Sir James was of inestimable value to the British Government during the war on account of his studies and discoveries of antitoxins for poison gas, the American Chemical Society is presenting him with its high token in recognition of his valuable researches on supercritical fluidity, dealing with starch and cellulose. The presentation is to take place in Chicago, September 17.

Now Is The Time For Canada To Put Forth Every Effort To Secure Immigrants

When Canada launched a vigorous "open door" immigration policy at the beginning of the present century, we made our first, and only, great stride in settling the west. We succeeded chiefly because we attracted our people intelligently and at a "tide." European countries, surfeited with population, were cranking up dire economic pressures, and our "free farm" propaganda carried a special appeal to the landless masses there.

It took the world the better part of half a million years to reach a population of 750 millions up to the year 1860. Food had normally been scarce and this near-starvation condition had acted as a powerful brake on natural increase and economic well-known economic laws. Thus came the golden age of invention, followed by rapid and cheap transportation on sea and land, which in turn led to the opening up of vast continents of virgin lands, constituting huge food reservoirs, in temperate zones overseas.

This, coupled with the increased mechanization of agriculture, relieved the pressure and automatically led to the most spectacular increase in world population that history records. With the brief century of the present, a part of which the world wallowed in cheap food, population doubled, reaching 1,500 millions in 1900. With European population at the very peak, Canada garnered her human harvest comparatively easily. But the day of easy colonization accomplishments is now over.

A new era has dawned. There are no more virgin worlds to conquer in temperate zones. The day of cheap food is definitely past, and presently the world will only be made to yield more abundantly than it has. Intensive and laborious process of intensive cultivation. Prof. East of Harvard, after painstaking investigation, tells us that if the same birth rate held steady by any chance continue, the world would be on the verge of actual starvation by 1960.

But economic laws are at work and we need entertain no apprehension. Vital statistics demonstrate clearly that the general birth rate is falling rapidly everywhere. Great Britain has the lowest birth rate of any nation, even lower than that of France. Economists now predict a stationary, or possibly receding, world population. Beyond all shadow of doubt, in fifteen or twenty years, Canada will look overseas in vain for surplus man power to develop her resources. And the birth rate of our own natives is falling ominously. We need construct no statistics to convince us of that fact.

So Canada is essentially working against time in her present hesitating colonization effort. With the passing of each year the problem of cheap labor is becoming more acute. For a few years yet the world may remain partly overpopulated with adults, but our chances to secure more people are dwindling steadily day by day. It requires no prophetic foresight to conclude that Canada's opportunity is "now or never."

And yet there is not the slightest reflection that our attention can be shaken out of the present sluggish attitude on this subject and that the fundamental and urgent national problem will be solved within nature's time limit. The stagnant, routine methods of the past are out-of-faded policies—C. W. Peterson in Manitoba Free Press.

A Death in Europe

German monarchy is dead. The news expressed when Hindenburg was elected were without basis. When nearly 15,000,000 German voters voted for the seizure of royal property the divine right of kings is a bygone doctrine. When those who oppose such seizure do not dare voice their beat it by abstention, there is little danger that the call for new kings, emperors to rule Germany will be heeded—New York World.

Students Get Toronto Fellowship

Graduates of five Canadian universities have been awarded seven special fellowships for graduate work in courses offered by the University of Toronto for the degrees of M.A. and Ph.D. It is announced. Among those who received awards were: E. H. Rennie, University of British Columbia; C. A. King, University of Saskatchewan; Miss A. A. Berkeley, of British Columbia.

Chinamen next to goldfishes, but let a Chinese landlady try to locate neat a church.

Insurance Against Single Crop Failure

Aaron Sapiro Says Hope Lies In Building Up Power of Constant Production

In "eggs and chickens" the Saskatchewan has its prosperity for the future, Aaron Sapiro, "father of co-operation," told the "Canadian Club in Regina." Mr. Sapiro compared the United States and Canada, with the advantage of Canada, in respect to successful farming.

He told of the tragedy caused in the United States by the dependence of certain sections on single crops of annual production and urged Saskatchewan business men to tell the farmer that the only adequate insurance against the failure of a single crop was by the building up of crops of constant production. In eggs and bacon, he said, were the growing opportunities for Saskatchewan in that direction, while the production and export of butter and other dairy products to the great London market could be increased by at least ten times, he declared.

Mr. Sapiro said he was doing no boasting about the United States. "I am going to eat a humble pie," he continued. "Never in the United States have we done anything so well, and so importantly well, as this wheat you have built up here. It is unique in the world. The single accomplishment in the history of co-operative marketing, and I stand and view it alone. Since my return to the United States three years ago I have received letters from every country in the world where wheat is grown, all praising the Canadian wheat pool, and the manner in which it operates."

"It is a beacon of hope for the wheat grower the world over."

Last Year's Grain Disappearing

Heavy Shipments Being Made To Prepare For New Crop

Last year's grain is fast disappearing from western elevators and stores. The Canadian Pacific reports that for the period from July 1 to 14 to date, this year 431,146 bushels were marketed from the Manitoba district as against 491,683 for last year. Saskatchewan, 259,290 this year, against 274,365 for last year. Alberta district, 394,239, as against 400,000. Total for the three provinces, an average of 1,252,621 per day, against 1,347,438 bushels.

Cars loaded in the Manitoba district this year are 264, compared with 447 last; Saskatchewan, 287 to 281 last year; this year 431,146 against 431,146 for same period last year, with a total loading of 815 cars against 1,045 cars in 1925. The average per day is 156 against 174 last year. All of which shows that when the crop is garnered, the Canadian Pacific will be in readiness to handle it with speed.

Lured To North Country

Scientists Seeking the Nesting Retreat Of the Blue Goose

Along the shores of Hudson's Bay, Dr. George M. Sutton, of Harrisburg, Pa., head of the educational bureau of the state game commission, in company with W. C. Weyle, curator of birds of Carnegie Museum, and John B. Sample, of Saskatchewan, are trying to find the nesting place of the blue goose. The expedition will be gone for three months, for which time Dr. Sutton was granted a leave of absence without pay.

The trip is financed by Mr. Sample and, while other information may be obtained and various rare specimens secured, the men were lured into the north country by the call of the blue goose. It is a migratory bird spending the winters in the south and doing much of the summer work. So far, both E. H. Gordon, of the state game commission, said scientists have been unable to find its nesting place.

Princess Becomes Householder

The latest housewarming in which the King and Queen participated was the occasion of Princess Victoria taking her abode at "Coppins," Iver, Buckinghamshire, when the Princess became her own householder for the first time. The house which the Princess is, is the King's sister, has been in quite small and has nothing about it to suggest royal ownership.

Kenneth—"Poor old chap! I saw you crying over that little lock of hair. You have my dearest sympathy. But you was lit?"
Arthur—"Thank's, old man. I was mine—before I became bald."

Cost Of Rearing Chicks

Interesting Experiment Yields Valuable Information For the Poultry Farmer

An especially interesting experiment to ascertain the rate and cost of growth in rearing chicks is chronicled in the annual report of Mr. A. Ste. Marie, superintendent of the Dominion experimental station at St. Anne de la Poculiere, Quebec. Three hundred and forty chicks were used and at the end of the experiment, which lasted 26 weeks, that is from April 5 to September 26, all the chicks were still alive. The feed consumed consisted of a home-grown grain ration, dry mash, rolled oats, eggs, skim milk, charcoal, grit oyster shells and greens (sprouted oats) kept constantly before the birds. Unfertile eggs taken from the incubator were boiled and served during a week at the rate of one egg per pound of mash, which was composed of equal parts of cornmeal, shorts, sifted oatmeal and meat meal. The mixed grains fed in the litter consisted of equal parts by weight of wheat, corn and oats. When hatched the chicks weighed an average of 2 ounces each, at the end of the two months 14 pounds, at the end of the 26th week 3.8 pounds each. The total cost of feed, as statistically detailed in the report, was \$108.88 and the cost per pound gained 11.4 cents. The total weight when hatched was 42.5 lbs. and at the end of the experiment 1,239 lbs.

Bruised Meat Exhibit

Losses on Livestock Due to Bruising Shown at Western Exhibitions

Something unique in the way of educational purpose was shown this year at the Calgary exhibition and stamped, and the Edmonton exhibition by the provincial department of agriculture. This is a special automatic exhibit pointing out the losses on livestock due to bruising incident to loading and shipping, and the provincial department is putting on the exhibit, in cooperation with the university, with packers, producers and others interested, in an effort to minimize the losses thus created, the extent of which is probably not realized by a large proportion of those handling livestock.

The Flight Of Geese

Confirmation of the belief that geese which visited Jack Miner's land many years ago is being confirmed by a return fall return to Hudson's Bay was afforded when Mr. Miner received a letter from the Hudson's Bay Company. The tags had been taken from geese that were shot by Indians in the vicinity of the post.

Famous Comic Artist Goes Fishing

Clare Bilgus, content-knower of "Gee and Mrs." recently remembered that fishing time was here and with six New York colleagues came north to the Windsor Station, Montreal, for a little excursion to the Laurentians where the red and grey game trout besought themselves and incidentally furnish sport to the followers of Frank Walton. He wandered as far north as the St. Lawrence, where he caught a couple of weeks with results that were very satisfying. Here you see him practicing in his New York flat prior to the trip. His fishing pole is a certain rod to which extent and a bobbin for a fish is attached and he is entirely concentrated on the job. If we don't know what he is trying to catch, but if patience means anything he should succeed in catching it.

The Toll Of Forest Fires

Annual Loss to Canada Runs Into Millions of Dollars

Forest fires are again taking a heavy toll of Canada's forest wealth in Western Alberta, British Columbia and in New Brunswick. Every year the country loses this point and the life loss. The damage to the nation's timber runs into millions of dollars annually. A fire can destroy in a few minutes trees that take half a century to come to maturity. When they are gone they cannot be replaced for another half century and their destruction is a loss not only to the individual who may own the timber limit, but to the whole nation, for part of the national wealth and the national heritage has been removed.

Various organizations, notably the Canadian Forestry Association, are at work in the country preaching the gospel of "Save the Forests." They are able appreciation of the value of the public domain. Much work remains to be done, especially in the development of effective fire prevention and fire-fighting. The cost of such work is not an important factor provided something can be done to stop the devastation from fire. The country can afford to spend thousands of dollars on effective fire prevention and fire control, but it cannot afford to lose millions in fire losses—Free Press.

Combines and the Consumer

Ultimate Consumer Should Receive the Benefit of Large Scale Operations

The best way for combines to bring about the benefit of the consumer is by the use of large scale operations. They have been granted much leeway, though often there is distrust of their financial setup and doubt whether they will be able to get into their hands what savings are effected by them find their way to the consumer's pocket. In other words, they are being allowed to get into their hands and power which may be readily abused and should watch their step—Baltic Sun.

Here's the Explanation

"What a bride is married in," remarks the Bruce Herald and Times. "Is about seven times as important as the fact that she is a rash conclusion. More facts is made over the bride's gown than the bridegroom on the wedding day. Perhaps, but the fancy the groom has been pretty well discussed before that day arrives, and this is the first appearance of the gown—of which News-Record."

Scientist Casts Doubt On The Report Of Ancient Inscriptions Found In Pacific Coast Region

Well Waters From Farm Homestead

Farmers Cannot Pay Too Much Attention To Purity of Water Supply

In his report for the year ending March 31, 1925, the Dominion chemist, Dr. Frank F. Shutt, some seven months direct attention to the mistake, which is frequently made of sacrificing safety for convenience in choosing the site of a well. Ideally the well, Dr. Shutt says, should be at least 120 feet from the nearest building, with clean soil, bare or stable, and the same distance from manure pile, cesspool or other possible source of dangerous pollution.

Examination of water supplies sent to the division of chemistry at Ottawa during the year has been shown 21.9 per cent pure and wholesome, 20.7 per cent suspicious and probably dangerous, 15.6 per cent, seriously polluted and 12.5 per cent saline (not potable). Although these percentages do not differ materially from those obtained in former years, the doctor states that there is something to be feared that farmers are paying greater attention year by year to the purity and care of their well waters.

In all cases, Dr. Shutt believes it is advisable to secure a fair degree of filtration by using the well with open concrete or clay to a depth of, say, ten feet, continuing this lining, if concrete, one foot above ground level to prevent the entrance of surface water. A good, sound water-tight cover is also of importance. He further says that in a bored well light sealing is done between the pipe and rock, and also between joints in the pipe and cover of the well.

Creamery Butter Competition

Awards Are Made For Exhibits At

Manitoba, Saskatchewan, Alberta, and Ontario

With the standardization of creamery butter, the product as exhibited at the western fairs has become a problem even to the careful grader who place the awards. So close were some of the awards at Calgary this year that it was just by a minute fraction that some of the prizes were awarded. The exhibit was larger than ever before, and Dairy Commission's Clark Marker was particularly well pleased.

All provinces from Ontario west were represented. The grand championship went to the Belmont Creamery, Belmont, Man., with 29.1 points; second to Manitoba Co-operative Dairies, Winnipeg, with 28.4 points; third to Shool Lake Creamery, with a score of 29.1 points. They win the gold silver and bronze medals. The provincial championships were awarded as follows:

Manitoba, The Belmont Creamery; Saskatchewan, Saskatchewan Co-operative Creameries, Regina; Alberta, Central Creameries, Calgary.

L. A. Gibson, western dairy commissioner for Manitoba, was judge. St. Boniface Creamery, Winnipeg, won two firsts and one second. P. Burns & Co., Verdun, Alta., had two firsts and P. Burns & Co., Ponoka, Alta., one first.

Maple Leaf Creamery, Leduc, Man., had two firsts. City Dairy, Winnipeg, had one first. Red Deer Dairy Products, Red Deer, Alta., had one first.

Caulder's Creamery, Saskatoon and Moose Jaw, had a second prize place.

Ignorance Is Profound

Some Americans Hold Quer Ideas Regarding Conditions in Canada

The Collingwood Bulletin shows how it is sometimes necessary to go from home to learn news that is not true.

A young Canadian was in a barber shop in Nebraska. When the barber found his customer was a Canadian he got considerably sympathetic. Among other things he was anxious to know how long much each Canadian has to pay annually as tribute to England. He seemed to have the idea that this tribute was collected by sheer force of arms. To barber could not understand how the Canadian people endure this "tribute to the feudalism of the king." The Nebraska barber's query is not strange. Any Canadian who has been through the country knows the appalling ignorance of the common citizens of the States across Canada.

The church committee favored the purchase of a chandelier. A new member opposed it. He said: "Well, chandeliers was a thing that was common after it after we got it?"

Some girls are like brown sugar—sweet but unrefined.

The report that recent inscriptions relating the story of a terrific battle between a band of Norsemen and Indians in the year 1010 A.D. have been found almost within the city limits of Spokane, on the Pacific coast, seems quite feasible to Professor A. V. Carr, curator of the archaeological section of the Royal Ontario Museum.

"That a party of Norsemen in the eleventh century before Columbus discovered America, crossed the continent of North America, especially taking women with them, seems altogether improbable to me," said Prof. Carr.

"Of course nothing is impossible," added Prof. Carr, "but it is one of those things that one would want overwhelming proof to accept. I remember that Stefanoff told me of the finding of a stone with Norse writing on it some time ago which would go to prove that a band of Vikings entered the Hudson's Bay before the time of Columbus and made their way down the coast to the west to the country which now forms some of the American states of the middle west."

"At first people were inclined to scoff at the whole incident. The Norse inscriptions on this stone now produced by some of the Vikings, have been many days' journey from the sea. People naturally thought at once that the Vikings had come to the coast from the hands which are supposed to have landed along the Labrador and New England coasts and have made their way inland across the continent of the United States to the west. The time of the inscriptions, of course didn't go back to the time of the Vikings, was connected with the story it was found that the 'so many days from the sea' mentioned on the stone inscription would do for a journey from the Hudson's Bay. Although it is so long ago that I don't recollect all the details, I believe that the Vikings' here was connected with the story it was found that the 'so many days from the sea' mentioned on the stone inscription would do for a journey from the Hudson's Bay. Although it is so long ago that I don't recollect all the details, I believe that the Vikings' here was connected with the story it was found that the 'so many days from the sea' mentioned on the stone inscription would do for a journey from the Hudson's Bay. Although it is so long ago that I don't recollect all the details, I believe that the Vikings' here was connected with the story it was found that the 'so many days from the sea' mentioned on the stone inscription would do for a journey from the Hudson's Bay. Domestic Express Company
Changes Name

After forty-four years of operating which it has grown up with the country and contributed in no small way to Canadian development, the Dominion Express Company will no longer be known by that name. After September first next that great transportation agency will be known as the Canadian Pacific Express Company. In all parts of Canada and the United States and throughout the civilized world signs on the windows of the many hundreds of branch offices will be changed, and thus will be forged a still closer link with the great parent company, whose railways, steamships and hotels are known around the world.

To mark the change of name the company has issued an attractive little booklet giving a short history of its career and a synopsis of its present widespread activities. The Dominion Express Company was incorporated in 1873, but it was in 1882 that Mr. Van Horne, then president of the C.P.R., took it over as an operating part of the Canadian Pacific Railway. Mr. G. A. Kirkpatrick, later Sir George Kirkpatrick, K.C., Gov. of Ontario, was its president and Mr. W. S. Stout, a young but thoroughly experienced expressman, became its superintendent. Mr. Stout is today president and has for many years guided its fortunes in that capacity.

For some years he and his assistants had a hard and uphill fight. They not only moved traffic but helped create it by finding Canadian and foreign markets for Canadian products and by scientific rate making encouraging the farmer, fruit grower and other whose markets were far away. The growth of the company over these many years is an interesting story and it is an important chapter in the commercial history of this country and its present position where it is daily entrusted with hundreds of millions of dollars in goods and treasure by the public, business institutions and the government is a matter of justifiable pride. The booklet is handsomely illustrated and is being widely distributed wherever the company operates.

BUSINESS LOCALS

Furnished bedroom to rent. Phone 198.

Barred Rock cockers for sale. L. C. Craner.

For Sale—Threshing outfit, complete, with bunk and coal cars. Apply J. O. White, Clareholm.

For Sale—Threshing outfit: Waerloo 25-hp separator and 12-25 engine; located seven miles straight west of Calgary. Apply Louis Koemmel, Carmichael, Alta. Also have for sale some pure bred Belton Hampshire hogs, pigs, 3 months old.

Reports from the Banff Springs Hotel and from agents along the line of the Canadian Pacific Railway from Banff to the Pacific Coast received at C.P.R. headquarters, state that the former Hotel at the Kootenay Park region at its nearest point are eighty miles distant from the hotel, and that they are nowhere near any of the tracks of the railway. Guests at the hotel and travelers on the railway have been in no way inconvenienced by the fires and there are now stated to be well within sight of control. Banff Springs Hotel is at the present time enjoying the business season in its history.

Here and There

The Right Honourable Viscount Kinnaird, attached to His Imperial Highness Prince Chichibu, second son of the Emperor of Japan, passed through Canada and left Vancouver for Japan where he will spend his vacation with his family. The Viscount will return through Canada to England in the fall.

Fifty-five young fellows who have been prepared for Canadian farming at the British Ministry of Labor's centre at Brandon, England, arrived in Canada recently on the Canadian Pacific S.S. "Empress of France." They came to this country, accompanied by Lt.-Col. G. A. Brinton, under the auspices of the Canadian Government and the C.P.R.

Arrangements have been made to install facilities for supplying both fuel and diesel oil to ocean liners which will dock at the monster new double decker pier "B" and "C" of the Canadian Pacific Railway now nearing completion in Vancouver harbor. It was announced that eight new elevators will be installed on the pier, the elevators being known as Barlow type on the Pacific coast.

282 Certificates were awarded to successful Sleeping and Dining Car employees of the Canadian Pacific Railway for passing their examinations in the First Aid Instruction classes. The extent to which First Aid instruction among C.P.R. teams is growing is indicated by the fact that the McAdam, N.B., team was recently awarded the Wallace Newbitt Trophy, in which competition Michigan and Maine also sent contestants.

Definite indications of the largest building year Canada has had in more than a decade are now shown by the record of the first six months of this year. The very large and unusual total of \$194,543,680 worth of new construction for the first half of the current year and contemplated new work to the value of \$140,000,000 forecasts a great activity for the remaining months. During June contracts awarded totaled \$64,186,400, an increase over June, 1925, of 83 per cent.

Net profits of the Canadian Pacific Railway for the month of May at \$2,448,876, compare with \$308,913 in the corresponding month of last year, an increase of \$1,839,962, being the best showing in this respect since 1921. Gross earnings for the month are shown at \$15,492,736, an increase of over three millions, when compared with May of last year, and the highest gross shown by the road for any May since 1920. Working expenses for the month under review are shown higher by 1 1/2 millions.

Two officials whose tenure of office was practically contemporary with the existence of the Canadian Pacific Railway, have recently retired from that company. They are C. J. Flanagan, auditor of freight and telegraph receipts, and J. H. Shearing, auditor of passenger receipts. Both were presented with gold watches suitably engraved, while members of their staffs gave to Mr. Flanagan a traveling bag, and to Mr. Shearing a necklace case with a gold band engraved with an expression of the esteem of his staff.

Mayor Thomas Foster, of Toronto, and Mayor Mederic Martin, of Montreal, took advantage of the newly inaugurated Canadian Pacific train "The Hudson" and "The York" between their respective cities to exchange letters of greeting. When "The Hudson" pulled out of the station at Toronto on its initial run, the engineer carried a letter from Mayor Foster conveying his greetings to Mayor Martin, who replied the following day in the same manner, but by "The York." Both trains make the run between Toronto and Montreal in eight hours.

Here and There

Formidably rapid development of forest and water power resources of the Province of Quebec is indicated in the forecast of revenue totalling \$6,000,000 from these sources for the current year. Last year the same resources produced a revenue of nearly \$4,000,000.

Sixty men from the training camp in Brandon and Claydon, England, have been accepted by the Canadian Government and sailed on the "Empress of France" as the crew of J. J. Macdonald, who is to be placed in charge of the ship at Quebec and will be placed on specially selected farms.

University men, municipal and government representatives, doctors, priests, notaries, lawyers and newspapermen made up the majority of the party of 100 people who took part in the across-Canada tour of the University of Montreal recently completed. They were fêted and welcomed by civic, university and government heads throughout their tour and return from it with a far clearer notion of the problems of the West than when they started. The tour was run on C.P.R. lines under the auspices of the University of Montreal, and was the second annual trip that has been made.

"B" SQUADRON ORDERS

Annual Ordnance Inspection

The annual ordnance inspection will take place early this year. All clothing, equipment, saddlery and military stores of all kinds must be turned in to the Quartermaster's store at the earliest possible date.

Fresh Natural Scenes With New Road

Beautiful Emerald Lake, now accessible. Left insert—pointing out
wonders on Lake McArthur. Right insert—Sicilian Canyon. Banff-
Windermere Highway.

THERE is a fresh unfolding of
the wonders of nature in the
new scenic area opened up by the
Lake Louise-Field Highway through
the mountains. The journey of the
Yoho National Park in British
Columbia, the Yoho Valley and
Emerald Lake are now accessible
to the motor world. This latest
achievement is the completion of a
motor highway across the famous
Kicking Horse Pass in the central
Rockies.

From Lake Louise, the gem of
the Rockies, the road proceeds west
through avenues of pine and fir
up to the Great Divide at Stephen.
By easy grades the motorist glides
down to Lake Wapta, the centre of
a romantic and picturesque region.
The descent continues through the
Kicking Horse Pass to the Yoho
Valley. Here, in British Columbia,
a part of the abandoned right-of-
way is used and some of the finest
scenery in the world is unveiled.
There is a marvelous view of the
Yoho Valley ending in its glitter-
ing glacier.
Winding down the side of Mt.
Stephen, the traveler comes to the
flats and Kicking Horse River, be-
tween Mount Stephen and Mount
Field. On the face of Mt. Stephen
can be seen, a few hundred feet

above, the opening to the silver-
and mine, which is reached from
the flats, by a winding trail. This
mine, opened in 1885, is unique in
its operation and in its situation on
the side of a grim mountain. It is
worth the effort of a trip up the
inclined and offers fine opportunity
for the amateur climber.
Driving along the river flats, the
train can be seen, many feet above,
winding their way along the side of
Cathedral mountain. Down the
river valley, the new road connects
with the existing motor road which
runs eight miles up the Yoho Valley
to Takakkaw Falls. The eupho-
nious Indian name meaning "At
wonderful," well describes the beau-
ties of the ribbon of water, with a
fall of 200 feet, in clouds of foam.
Another branching, tree-lined ave-
nue leads to Emerald Lake, a dis-
tance of seven miles. This lake,
of exquisite coloring, lies placid
under the protection of Mount
Wapta. Burgess and President, and
affords fine fishing.
At Field, the natural bridge is
one of the points of interest. A
road is under construction from this
junction to the western boundary
of Yoho park. Then it will be
linked up with a highway now being
built from Golden.

THE WHEAT POOL AND TRADING IN FUTURES

(Quoted from the Chicago Price Current,
Grain Reporter, issue of August 4th, 1926.)

The feature of the last day of the
month's trading was the heavy deliv-
eries of wheat to the trade by the
wheat pool. It is estimated that at
least \$100,000 worth of the total deliv-
eries for the day were from the
pool. The pool all the week has been
pounding the market and checked any
advances by throwing in the stuff in
chunks.

This is perfectly legitimate busi-
ness. The pool is a member of the ex-
change, and entitled to the facilities
provided for it as a member. Its
operations in futures are on a very
large scale.

But the promoters and propagand-
ists responsible for its organization
announced that one of the main ob-
jects of the pool was to break up the
Winnipeg Grain Exchange. It was
also frequently charged, as far as the
pool was concerned, that it was in
fact inaugurating a new and enligh-
tened method of marketing. This busi-
ness was reevaluated by the ex-
change, but not all. From now on the
highly paid pool propagandists will
find their ingenuity taxed to explain
At that, you can't fool all of the people
all of the time.

The Canadian Co-operative Wheat
Producers, Ltd. (The Wheat Pool) is
in the limelight these days. The pub-
lic and the pool members have been
informed that officials of the com-
pany suffered from writer's cramp
from signing checks, and how mil-
lions of dollars have been distributed
among the members of the pool by
the interim payment of July 26.

So far members have received
\$140 a bushel for No. 1 Northern
wheat. In a statement issued by
pool officials they are led to hope that
they may get a little more. The pre-
sident of the Manitoba pool offers a
word of comfort to the pool paid \$1.40
all told last year. He did not depress
his clients by telling them more. How-
ever, they know it now that they have
their checks.

On the trading floor of the Ex-
change the feature of the past week
has been the persistent
selling of futures by "A certain big
interest." Brokers do not divulge
the name of this customer, but pit
traders know where this selling is
coming from. This selling is on the
face of it by parties who have the
whost to deliver and mean to deliv-
er it.

As it is, \$1.40 a bushel looks small
compared to \$1.55, the average
price paid by the trade. It would
look smaller should the average price
by the end of the crop year be \$1.60
or over.

The general conclusion is that the
big interest is more interested in
keeping prices down than in any other
relief for the present.
